

Juvederm

Are you unhappy with wrinkles, fine lines, or sagging skin due to the natural aging process? Over time as our skin continues to lose hydrating properties that keep it looking voluminous and youthful, it can cause the quality of skin to appear aged. If you are searching for a non-invasive solution for eliminating aging concerns to achieve a more youthful complexion, the professionals here at Regenerative Treatment Centers can help. With revitalizing Juvederm dermal fillers, you can instantly smooth away wrinkles, restore lost volume, and achieve supple and younger-looking skin.

What is Juvederm?

Juvederm is a line of advanced injectable dermal fillers that are specially designed to target and diminish the negative signs of aging for younger looking skin. This widely popular line of injectables are so effective because they are composed of hyaluronic acid. Hyaluronic acid is a naturally occurring substance within skin that is responsible for volume and elasticity, which continues to decrease overtime. With Juvederm injectables, you can restore youthful volume beneath the surface while instantly softening the surface of skin.

Products

Each product on the Juvederm line is uniquely designed to target specific areas of facial skin that are commonly susceptible to the development of aging concerns. Rejuvenating Juvederm products that we offer include:

Juvederm Ultra Plus XC

The loss of fullness and youthful fat beneath skin can cause skin to droop and sag. Juvederm Ultra Plus XC is an FDA-approved remedy for instantly plumping up the surface of skin for added volume and a youthful facial contour.

Cost: \$575 per syringe (additional - \$500 per)

Juvederm Ultra XC

Lips often lose fullness over the years, resulting in thinner lips that lack shape and suppleness. Juvederm Ultra XC is formulated to instantly add subtle yet noticeable volume to lips for the size and shape that best suits you. This revitalizing product can restore a youthful shape and fullness to your lips with no required downtime.

Voluma

Midfacial volume loss within cheeks is a common concern for many people as they age. Voluma is an effective solution for reversing midfacial volume loss by instantly lifting the surface of skin in the targeted treatment areas for a youthful fullness and smooth facial contour. With this rejuvenating filler treatment, you can reclaim the smooth and voluminous look of your skin with results that speak for themselves.

Each of these specialized Juvederm products are a safe and FDA-approved solution for instantly correcting the negative signs of aging. Treatments are quick and since they are non-invasive, there is no required downtime afterwards.

Cost:

Single: \$725 per syringe

Package of 3: \$2000 (additional if needed - \$600 per)
