

# Platinum Facial

RTC offers the Platinum Facial treatments, a unique skin rejuvenation treatment that combines microneedling with PRP therapy, for patients who are interested in reducing the visible signs of age and improving the overall quality of their skin. This treatment works to improve the quality of your skin at a cellular level for a radiant, younger-looking complexion.

Taking skin rejuvenation beyond microneedling and even the plasma facial. The Platinum Facial utilizes medical microneedling and a revolutionary new regenerative tissue product, NS-Pure, a topical extracellular matrix consisting of growth factors, nano sized micropods, collagen elastins, hyaluronan, cytokines, and fibroblasts from bio-ethically derived amnion membrane, wharton's jelly, and chorionic villi.

## **How it works:**

The beauty behind this procedure is that it exponentially increases the healing and rejuvenation of your skin leaving it looking younger and more vibrant than it ever has. The Platinum procedure is our patients' most popular facial resurfacing procedure, even over the Plasma facial. NS-Pure has antimicrobial properties and bioactive molecules which stimulate collagen growth, wound healing and promote healthy skin resurfacing. This process leaves you looking younger with more vibrant and radiant looking skin.

## **Conditions that a Platinum Facial can be used to treat include:**

- **Dark circles in the under eye area**
- **Fine lines**
- **Acne scars**
- **Crow's feet**
- **Sun damage**
- **Uneven skin tone and texture**
- **"Crepey" skin in the eye, neck, and/or décolleté areas**

## **What can I expect during a treatment session?**

Platinum Facial treatment sessions can last anywhere between 30 minutes to one hour. First, we apply numbing cream to the face and we will take out the NS-Pure from the Cryofreezer where it will thaw for approximately 10-15 minutes. The NS is then applied to the face and treated with microneedling, which allows the NS-Pure to deeply penetrate the skin and maximized the effects of both treatments. There is little to no downtime associated with this minimally-invasive treatment and most of our patients are able to resume their normal routines immediately following a treatment session.

# Platinum Facial

**Treatment areas include face, neck and chest.**

**1 treatment area**

Single treatment: \$600

Pack of 3: \$1500

**2 treatment areas**

Single treatment: \$800

Series of 3: \$2100

**3 treatment areas**

Single treatment: \$1100

Series of 3: \$3000

**When will I see results?**

You may begin to see an improvement in the tone of your skin within a few days of your Vampire Facial. The most visible results of this skin rejuvenation treatment usually develop within two to three months of your treatment session and can last for up to two years. Multiple treatment sessions may be required in order to achieve your desired aesthetic goals. Results may vary.

**Am I a candidate?**

Prior to your Platinum Facial, we will review your skin type, skin concerns, and general health and determine if this is the right aesthetic treatment for you.
